SENIOR AND FET PHASE

Welcome Message

Future Education Centre would like to thank you for your enquiry to enroll your child at our centre. We look forward to welcoming you and your child to join our family in education. Since its inception, Future Education Centre has strived to help a variety of students reach their full potential. We believe that students do not learn as we teach, but rather that we should teach as they learn.

At Future Education Centre, we believe that education goes beyond textbooks. Our approach blends academic excellence with practical skills, ensuring that students are well-equipped for a rapidly evolving world. Whether you're here for academic support, skill development, or personal growth, our team is committed to guiding and inspiring you every step of the way.

This booklet contains the basic information regarding our Centre and what we have to offer your family. Should you have any questions in addition to the information provided, please feel free to contact us. Our doors are always open and we welcome questions, concerns and ideas offered to us.

Attached you will be given an application form that must be completed and returned to school before your child commences at Future Education Centre. Please ensure all the necessary documents are attached to the forms. Should you be interested in enrolling your child, please ensure you secure your space as soon as possible.

Welcome to a future of endless possibilities!
The Future Education Centre Team

Vision and Mission

Vision

At Future Education Centre, we envision a world where every student has the opportunity to unlock their full potential through personalized, innovative, and forward-thinking education. We strive to create a dynamic learning environment that nurtures curiosity, critical thinking, and adaptability, preparing young minds for the challenges and opportunities of the future. By fostering a passion for lifelong learning, we aim to empower students with the skills, knowledge, and confidence needed to excel in an ever-evolving global landscape.

Our vision is to be a leader in modern education by integrating individualized tutoring with the latest advancements in teaching and technology. We are committed to bridging the gap between traditional learning and real-world applications, ensuring that each student receives the support they need to succeed academically and beyond. Through our dedication to excellence, innovation, and holistic development, we aspire to shape a future where education is not just about acquiring knowledge but about creating empowered, independent, and forward-thinking individuals.

Mission

At Future Education Centre, we are dedicated to expanding young minds by fostering curiosity, critical thinking, and a lifelong love for learning. Our mission is to equip students with the knowledge and confidence needed to thrive in a rapidly evolving world. Through individualized tutoring, we recognize each student's unique strengths and challenges, providing personalized support that enhances academic success while nurturing essential problem-solving and life skills.

In today's modern world, where education and technology intersect, we embrace innovative tools and interactive teaching methods to enrich the learning experience. By integrating digital resources and real-world applications, we prepare students to adapt and excel in an increasingly complex and interconnected global landscape. Our goal is to cultivate forward-thinking individuals who are ready to embrace future opportunities with confidence and resilience.

Our Centre

Future Education Centre is a dynamic learning institution dedicated to expanding young minds through personalized and innovative education. We believe that every student has unique strengths, challenges, and learning styles, which is why we offer individualized tutoring tailored to their specific needs. Our goal is to provide a supportive and engaging environment where learners develop critical thinking skills, confidence, and a lifelong passion for knowledge.

In a world where education is constantly evolving, we embrace modern teaching methods, digital resources, and real-world applications to ensure our students are prepared for the future. Whether through one-on-one tutoring, interactive learning strategies, or skill development programs, we are committed to nurturing well-rounded individuals who are ready to excel academically and thrive in an ever-changing global landscape.

History

Future Education Centre began as a dedicated online one-on-one tutoring platform, driven by a passion for personalized learning. We recognized the need for tailored academic support that catered to each student's unique learning style and pace. Through interactive virtual sessions, we provided individualized guidance that helped students build confidence, improve their academic performance, and develop essential problem-solving skills in a flexible and supportive environment.

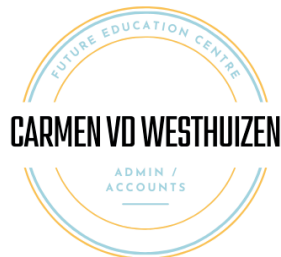

As our impact grew, so did our vision. The success of our online tutoring led to the establishment of a physical learning space where students could engage in a dynamic classroom setting while still benefiting from our personalized approach. This transition allowed us to create an interactive and collaborative environment where students not only receive academic support but also develop social and critical thinking skills. Today, Future Education Centre continues to bridge the gap between traditional and modern learning, ensuring that every child receives the tools they need to succeed.

Our Team

Our team embraces a modern, student-centered approach, combining innovative teaching methods with a deep understanding of each learner's unique needs. Whether in a one-on-one setting or a classroom environment, we strive to create a supportive and engaging atmosphere where students feel encouraged to explore, question, and excel. At Future Education Centre, we are not just educators—we are mentors, motivators, and champions of lifelong learning.

Our Team

Chas Brand – Director

Chas Brand is a dedicated leader at Future Education Centre, committed to shaping a learning environment that nurtures and empowers young minds. With a passion for personalized education, Chas has played a key role in transitioning the centre from an online tutoring platform to a dynamic physical classroom setting. Her expertise in innovative teaching methods and student development ensures that every learner receives the support they need to thrive in an ever-changing world.

Carmen van der Westhuizen – Director & Accounts Manager

Carmen van der Westhuizen is a dedicated director and the accounts manager at Future Education Centre, ensuring the smooth operation and financial sustainability of the institution. With a keen eye for detail and a passion for education, she plays a vital role in both administrative management and the strategic growth of the centre. Carmen's commitment to excellence and efficiency helps create a well-structured learning environment where students and educators can thrive.

Online Schooling

At Future Education Centre, our online classes provide students with flexible, personalized learning from the comfort of their homes. Designed to accommodate different learning styles and academic needs, our virtual sessions offer one-on-one tutoring as well as small group lessons led by experienced educators. Using interactive digital tools, engaging lesson plans, and real-time feedback, we ensure that students receive the same high-quality education as they would in a physical classroom. Our online platform makes learning accessible, convenient, and effective, allowing students to thrive no matter where they are.

How It Works

At Future Education Centre, our online classes are designed for a seamless and engaging learning experience. We use Google Classroom as our primary platform, where students can access lesson materials, submit assignments, and interact with teachers. Classes are scheduled at set times, and students are expected to log in promptly to maximize their learning. Each session includes structured lessons with interactive discussions and activities. To ensure focus and productivity, we incorporate scheduled breaks, allowing students to recharge before continuing with their lessons. Our goal is to create a balanced and supportive online learning environment that keeps students engaged and motivated. We are proud to announce that we are currently developing our own virtual classroom.

What You Will Need

To participate in Future Education Centre's online classes, you will need a laptop or computer with a stable internet connection to ensure smooth access to lessons and assignments. A webcam is essential for interactive sessions, allowing for real-time engagement with teachers and classmates. We provide a stationery list outlining necessary supplies you will need. Additionally, a list of the necessary textbooks can be found on the curriculum website. To create an optimal learning environment, students should set up a quiet and comfortable workspace free from distractions, ensuring focus and productivity during lessons.

On Campus Learning

Located in Athlone, Future Education Centre offers a welcoming, modern campus where students can learn, grow and feel supported. Our contemporary classrooms are equipped with televisions that educators use to present interactive lessons, visual resources and engaging educational content. Small class sizes allow for personalised attention, meaningful participation and stronger relationships between students and educators. The campus also includes comfortable learning spaces and an on-site gym, supporting both academic development and physical well-being. With a structured daily programme, dedicated break times and a nurturing environment, our Athlone campus provides a balanced and engaging educational experience tailored to each student's individual needs.

Our Athlone campus offers two flexible on-campus learning options to accommodate different educational needs. Our Teacher-Led Learning option provides students with instruction and academic support from a qualified educator who guides them through their online curriculum, explains key concepts and monitors their progress. Alternatively, our Learning Hub provides students with a safe, structured and supervised environment in which to work independently through their online curriculum. Students manage their own learning material and pace while an on-site facilitator oversees the learning space, supports daily routines and helps students remain focused and accountable.

On Campus Learning

How It Works

At Future Education Centre, students are required to arrive on campus by 7:45 AM, allowing them time to set up their laptops and prepare for the day ahead. Classes run from 8:00 AM to 2:00 PM within a structured and engaging learning environment. We integrate Google Classroom into our daily programme, giving students convenient access to assignments, learning resources and important announcements while blending digital tools with educator-led instruction. Each school day includes interactive lessons, practical activities and collaborative projects designed to strengthen understanding and encourage active participation. Scheduled breaks also give students time to recharge and socialise. This balanced approach creates a dynamic and supportive educational experience that prepares students for continued academic success.

What You Will Need

To participate in our on-campus programme, each student is required to bring a laptop and charger to ensure uninterrupted access to online lessons, assignments and learning resources. Families will receive a stationery list outlining the necessary stationery items for the academic year. Future Education Centre provides the required textbooks and art supplies used during lessons.

One on One Tutoring

At Future Education Centre, our one-on-one tutoring sessions offer personalized support tailored to each student's unique learning needs. Sessions are limited to a maximum of two students per tutor, ensuring focused attention and individualized guidance. Each lesson lasts one hour, providing ample time to address specific topics and strengthen understanding. Students can book as many sessions as needed, depending on their academic goals. Our flexible, pay-per-lesson structure allows families to arrange tutoring based on their schedule and budget, making quality education accessible and adaptable to every learner.

How It Works

Our one-on-one tutoring at Future Education Centre is designed to provide personalized support tailored to each student's needs. To get started, students or parents fill out a form outlining their academic goals, challenges, and specific subjects they need help with. Based on this information, we carefully match each student with a qualified tutor best suited to their learning style. Tutoring sessions are supported by Google Classroom, where students can access lesson materials, submit work, and track progress. Tutors also provide extra notes and resources to reinforce learning, ensuring students gain confidence and a deeper understanding of their subjects.

What You Will Need

To participate in Future Education Centre's one on one tutoring, you will need a laptop or computer with a stable internet connection to ensure smooth access to lessons and assignments. A webcam is essential for interactive sessions, allowing for real-time engagement with tutors. Basic stationery to use during the sessions. To create an optimal learning environment, students should set up a quiet and comfortable workspace free from distractions, ensuring focus and productivity during lessons.

Our Curriculums

CAPS

The South African online school curriculum is called the Curriculum and Assessment Policy Statement (CAPS). CAPS form part of the National Curriculum Statement Grades R – 12, which represents a policy statement for learning and teaching in South African schools. The following subjects are covered in Grades 8 and 9 : English Home Language , Afrikaans First Additional Language , Mathematics , Natural Sciences Technology , Social Science , Economic and Management Sciences , Creative Arts , Life Orientation. From Grade 10, students can choose for a wider range of subjects

GED

Internationally, the GED® is the number one most recognised higher secondary certificate. The GED® program is the only higher secondary certificate offered in over 85 countries and accepted by almost all universities in the United States and many globally. It is important to note that you must be 17 or older to join this adventure and take the external GED exams. We suggest that before you embark on this journey with us, make sure your dream college / tertiary institution accepts the GED.

British International

The British International curriculum is a very structured curriculum that is designed to meet the needs of all students, stretching brighter children and supporting those who need it through differentiated teaching and learning activities. Over 10,000 schools in over 160 countries follow the British International curriculum. The curriculum follows 3 main stages, Stage 8, International GSCE and AS Level each covering a variety of different subjects.

Contact Us

At Future Education Centre, our doors are always open to students, parents, and anyone interested in learning more about our programs. Whether you have questions, need assistance, or would like to enroll, we are here to help!
